Developing and Validating Test Items

Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author’s previous book, Developing and Validating Multiple-Choice Test Items, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author’s long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various
selected and constructed response formats and uses many examples to illustrate correct and
incorrect ways of writing items. Strategies for training item writers and developing large numbers
of items using algorithms and other item-generating methods are also presented. Based on
Theory and Research – A comprehensive review and synthesis of existing research runs
throughout the book and complements the expertise of its authors.

Your Madness, Not Mine - Stories of Cameroon

Women's writing in Cameroon has so far been dominated by Francophone writers. The short
stories in this collection represent the yearnings and vision of an Anglophone woman, who
writes both as a Cameroonian and as a woman whose life has been shaped by the minority
status her people occupy within the nation-state. The stories in Your Madness, Not Mine are
about postcolonial Cameroon, but especially about Cameroonian women, who probe their day-
to-day experiences of survival and empowerment as they deal with gender oppression: from
patriarchal expectations to the malaise of maldevelopment, unemployment, and the attraction of
the West for young Cameroonians. Makuchi has given us powerful portraits of the people of
postcolonial Africa in the so-called global village who too often go unseen and unheard.
